Why Choose Concierge Medicine?
As the national healthcare crisis continues to grow, it is becoming increasingly difficult for patients to manage their own healthcare, or even to easily access their own healthcare provider. But staying healthy and managing chronic medical conditions are within your control. Savvy consumers know that concierge medicine allows them to take charge of their healthcare with a personal physician who is continuously and directly available to them.

Our Lady of Hope Clinic offers benefactors:

- **A PERSONAL** physician who knows you and your medical history
- **DIRECT** access to your primary care doctor, twenty-four hours a day, seven days a week
- **EXTENDED** appointment times of at least 30 minutes, every time
- **SAME DAY** or next day scheduling—no more waiting weeks to see your doctor
- **UNLIMITED CARE**—Benefactors may see their physician as often as necessary without incurring additional charges
- **FAMILY FOCUSED**—Doctors who not only know you, but know your family as well

Becoming a Benefactor
By choosing to become an Our Lady of Hope Clinic benefactor, you are taking another step towards getting or staying healthy. Your doctor will work with you to create a preventative and healthy lifestyle plan that is tailored to your specific needs. You and your doctor are in charge of your health—not your medical insurance provider because Our Lady of Hope Clinic does not accept or bill for medical insurance*. This concierge model of care empowers patients - not insurance companies - to take charge of their own care. Busy schedules, high co-pays and costly premiums are no longer obstacles to excellent primary care. And patients never receive a bill or pay a co-pay at Our Lady of Hope Clinic. Benefactors pay only an annual fee, which may be paid in monthly installments.

A Financially Savvy Decision
Enrolling as a benefactor isn’t just a wise health care choice. It can also be financially savvy for health care consumers. Individuals who purchase their health insurance directly can often break even or actually save money by raising their deductible and enrolling as benefactors for primary care. Furthermore, it might be possible to write off the benefactor contribution as a tax deduction, either as a business expense, medical expense or a charitable contribution. Consult your tax preparer for more information.

Taking Care of Yourself & Your Neighbors
The physicians at Our Lady of Hope Clinic practice medicine that is consistent with the Catholic healthcare tradition, although they treat and respect patients of all faiths. In addition to providing concierge medicine to our benefactors, and in accordance with our physicians belief of providing for the needy, Our Lady of Hope Clinic also offers free medical care to our community’s uninsured population. By becoming a benefactor, you are also supporting our philanthropic efforts.

*All benefactors are required to carry supplemental medical insurance to provide for services not available at the Clinic such as visits to specialists and hospital stays.
Meet the Doctor

Dr. Michael Kloess

Dr. Mike received his medical degree from Southern Illinois University School of Medicine in 2000. Following his residency at Siouxland Medical Education Foundation in 2003, he worked as a family practice physician in Richland Center, Wisconsin for three years. In 2006, Dr. Mike joined the Marshfield Clinic where he worked in urgent care until 2009 at which time Our Lady of Hope Clinic opened. The scope of Dr. Mike’s medical practice has always focused on preventative care and outpatient management of chronic medical conditions. Some of the chronic medical conditions Dr. Kloess manages include diabetes, high blood pressure, elevated cholesterol and asthma. He is equally comfortable seeing well child exams, cough and colds or acute injuries. In addition, his medical interests include Natural Family Planning consults, women’s healthcare and medical ethics.

A Brief History

Our Lady of Hope Clinic first opened its doors in the spring of 2009. The founding physicians were concerned by the state of the nation’s healthcare climate and their inability to spend enough time with individual patients. Additionally, through his experience in the ER and urgent care, it was clear to Dr. Mike that many uninsured patients were not receiving adequate primary care. Uninsured patients were being seen in the ER for chronic medical conditions that could have easily been treated in a primary care clinic for significantly less cost. At Our Lady of Hope Clinic, Dr. Mike is able to give his benefactors truly personalized care, and free care to his uninsured patients—a truly innovative solution that benefits everyone who walks through our doors.
